ABSTRACT

This bibliography brings together all the publications in the Colorado State University Library which bear the Colorado State University imprint. It consists of 1059 citations of scholarship, research, and literature which the University has published from 1970 through 1976. The arrangement of the bibliography is either by author or main entry as they appear in the Colorado State University Libraries' card catalog. Single author entries are entered on the first line of each entry followed by the title, edition, place of publication, pagination, and other pertinent data regrading illustations, portraits, maps, and the physical size of the publication. Content notes, descriptive information about the publication, and the call number conclude the entry. Indexes appended to this bibliography are by personal/corporate author, title, and Library of Congress subject headings that refer the reader directly to the numbered bibliographical entry. The bibliography is considered to be an ongoing project with tentative plans calling for the issuance of a yearly supplement. Theses and disserations are not included. (Author/JPF)

INTRODUCTION

The purpose of this bibliography is to bring together all the publications in the Colorado State University Libraries which bear the Colorado State University imprint. As a record of University publications, the bibliography provides a service to the reader, Colorado State University, and other land grant related institutions that permits a greater accessibility to the scholarship, research and literature the University has published from 1870 through 1976. The bibliography is considered to be an ongoing project with tentative plans calling for the issuance of a yearly supplement and a cumulated volume every three years.

A dominant trend in Colorado State University's publication program is that of greatly increased production. As a consequence, the University Libraries' role in the securing of and making available to its patrons all University publications has become one which is increasingly demanding in time and effort. It is recognized that the holdings of the Libraries are incomplete and that it therefore must follow that this bibliography is likewise lacking in completeness. To rectify this situation as it pertains to past as well as current publications, any omissions discovered by the reader should be brought to the attention of the Gift and Exchange Librarian.

By definition, a Colorado State University imprint is any publication which states or implies that either Colorado State University or one or more of its constituent colleges, schools, departments, offices or other components is its author, editor, compiler, publisher, printer, distributor, or sponsoring agent. All publications by the University under its various names are included. These names are: State Agricultural College, Colorado Agricultural College, Colorado State College of Agriculture and Mechanic Arts, Colorado Agricultural and Mechanical College, and Colorado State University.

The arrangement of the bibliographical entries is either by author or main entry as they appear in the Colorado State University Libraries' card catalog. Single author entries are all entered on the first line of each entry. They are followed by the title, edition, and place of publication. Next, after this basic information, is the pagination and other pertinent data regarding illustrations, portraits, maps, and the physical size of the publication. Content notes, descriptive information about the publication, and the call number concludes the entry. For author titles which have more than one author, the first listed author only is cited. The names of additional authors appear in that part of the entry which follows the title.

Publications that are in a series, such as bulletins, technical reports, circulars, papers, reports, etc. are usually listed as such. A few publications in some series, however, are listed by individual author and title because each of them has been cataloged separately. For publications which are entered as a series, there are several bibliographies or check sheets that list many of these publications individually. The references just preceeding the indexes list these publications and should be consulted for individual publications within series which are not listed separately in the bibliography. Included in this reference list is A Guide to Colorado State University Theses. As this publication lists theses and dissertations, they are not entered in this bibliography.

Indexes appended to this bibliography are by personal/corporate names, titles, and Library of Congress subject headings that refer the reader directly to the numbered bibliographical entry. Cross references, such as "see" and "see also" used in library practice have been incorporated into the indexes to clarify and take the user to the corresponding entries.

Bringing as many University imprints as possible into one publication such as this has been a task requiring much time and effort. The searching of the University Libraries' Archives, Document Department files, and the card catalog were basic to the approach in this compilation. University catalogs and bibliographies and certain library reference sources were also scanned and read for imprints. In addition, three major computer generated data bases, ERIC, NTIS, and DDC have been searched. In many instances search findings often required a process of filtering a lot of data and information to determine if items were indeed imprints. As a result of these searches, it has been determined that there are approximately 386 known items that very likely are University imprints which are not in the Libraries. An effort to obtain these publications from the various departments of the University will be made so that these items can be entered eventually in the bibliography.
